Imp.

Dear Dr. Gopal Krishna Ji,

I wish to inform you that Punjab has achieved very good shrimp production in its first attempt itself this year (average 8.0 tons per ha). Its farming was carried out in 19 ponds with an area of 15 hectares wherein 121 tons of L. vannamei has been produced. We have already initiated process for next season which will be starting from February onwards.

We wish to put on record that your Regional Research Centre at Rohtak has extended exemplary help to Fisheries Department Punjab starting from water sample analysis, training of prospective shrimp farmers, organizing farmer's visit to Andhra Pradesh and Tamil Nadu to witness shrimp breeding, farming, their hatcheries and feed manufacturing establishments. The Scientist In-charge, RRC, Rohtak Sh. Harikrishna played a vital role as member of our Screening Committee in taking right decisions and visited several times along-with his scientists during shrimp farming and harvesting time. I had number of discussions with him over phone as and when required.

I take this opportunity to thank you for allowing your RRC Rohtak Scientists to help us and express our gratitude to the Scientists there for helping us in this first time venture.

With Regards

Madan Mohan
