

Three days training program for the women farmers of Nandurbar district, Maharashtra

31st January to 2nd February 2019, Nandurbar, Maharashtra

ICAR- Central Institute of Fisheries Education, organised a three days training programme on **Cage Aquaculture** at ICAR – Central Institute of Fisheries Education, Mumbai, Maharashtra for the women fish farmers of Nandurbar district, Maharashtra from 31st January to 2nd February 2019. A group of 18 women tribal fish farmers from different villages i.e. Navapor, Dhadgaon and Toranmal of Nandurbar district participated in the programme.

First day i.e. on 31/1/2019 the program started with registration of participants and introduction of participants and faculty. A brief background about the importance of cage culture, site selection, cage structure, construction and installation of cages and species selection were covered. Women were shown cage structure by using cage models and a small cage was also tied and floated by them in the pond.

On the second day they learnt about the soil and water quality requirement for cage aquaculture and their testing. Fish seed stocking in cages, feeding and maintenance of cages, materials required for cage construction, fish feed ingredients and feed preparation, were explained and practically demonstrated.

On the third day the woman were taken for field visit to Dimbhe reservoir, where they studied cage aquaculture being practiced by tribals of Dimbhe, its operation and maintenance.
